

# HIGH DEFINITION PLASMA

Tight tolerances  
Improved hole quality  
Faster turnaround

Hypertherm

Industrial Metal Supply now owns the fastest  
most versatile Hi-Def Plasma in the Southwest

- Enjoy superior cut quality and consistency
- Maximize your productivity
- Minimize your production costs
- Experience unmatched reliability
- Benefit from quick turnaround

# Reduce your secondary operation and go straight to assembly – with parts cut on the Hi-Def plasma you will:

- Eliminate the time it takes to grind away dross (virtually dross free) -mild steel 38mm (1 1/2")
- Enjoy the consistent squareness of parts
- Production pierce capacity
- Maximum cutting capacity (edge start) - mild steel 80mm (3.2")

With improved bolt hole quality you'll experience reduced material handling and saved time by eliminating the bottlenecks created downstream in the workflow at welding stations

Non bolt-ready hole

Bolt-ready hole

## WHY METAL?

- 10' x 20' cutting area
- Cuts thicknesses up to 3" on sheet and plate  
Mild Steel—Stainless Steel—Aluminum

## WHY IMS?

- Quick turnaround on quotes and delivery
- Local Provider
- Prototype or Production Quantities
- ISO 9001 certified
- Engineers on staff
- Any Drawing Format
- Materials In Stock
- 24 Hour Production
